

SEEDS

The NOP requires the use of certified organic seeds unless not commercially available. See OEFFA's Seed & Planting Stock Sourcing policy for more information about searching for organic seeds. Synthetic seed treatments are prohibited unless included on the National List. Genetically engineered/modified (GMO) seeds are prohibited in organic production. If using non-organic seed when organic is not commercially available, you must also obtain verification that your seed is untreated and non-GMO.

List all seeds (see reverse for seedlings and annual and perennial planting stock) used or planned for use in the current year (including seed used on transitional fields). Check the appropriate boxes below. Attach additional sheets if more space is needed. Produce growers may submit seed order sheets or invoices showing complete information instead of completing this table

Summary of Organic Seed Search (if untreated/non-GMO seeds were used):

Seedlings and Planting Stock

NOP §205.204

PURCHASED SEEDLINGS

Annual seedlings must be certified organic unless they meet the requirements under NOP §205.204(a)(3), (5). See the OEFFA Policies & Procedures book for more information on seedlings.

List all purchased seedlings and check the appropriate boxes below. Attach additional sheets if more space is needed. *If you manage the production of seedlings at another location, all information regarding seedling management must be supplied in the Seedling and Planting Stock Production section and the site must be inspected.*

PURCHASED PLANTING STOCK (e.g. garlic, potatoes, onion sets, sweet potato slips, strawberry plugs, trees, shrubs, etc.)

NOP Standards require the use of certified organic planting stock unless not commercially available. See OEFFA's Seed & Planting Stock Sourcing policy for more information about searching for organic planting stock. Genetically engineered/modified (GMO) planting stock is prohibited in organic production. If using non-organic planting stock when organic is not commercially available, you must also obtain verification that your planting stock was not treated after harvest and that it is non-GMO. Non-organic perennial planting stock can only be marketed as organic after one year of organic management.

List all purchased planting stock and check the appropriate boxes below. Attach additional sheets if more space is needed. **Produce growers may submit planting stock order sheets or invoices showing complete information instead of completing this table.**
